Bldg D FOB & Tele-Entry System Down - Repair Pending

The FOB and Linear Tele-entry systems allowing access to Bldg D have not been operating today, notwithstanding our Maintenance team's efforts to reset the system. Our controlled access vendor Apex Integrated was called earlier today, and based on the description they believe a reader board may need to be replaced. An Apex technician is now scheduled to come out to the property tomorrow, with the reader board they suspect is the problem.

We hope to have the system back up and running tomorrow.

In the meantime, please use your A5 key (or FOB into Bldg C and use the bridge connecting Bldgs C&D) to access Bldg D. If you have a tenant in need of an A5 key for access, and they are unable to reach the Unit Owner to obtain permission to obtain a key, please ask them to come to the Management office for assistance.
