Construction Defect Intrusive Testing Put-Back Continues

Reconstruction Experts (RE) will continue to be onsite for another 1-2 weeks putting back the building materials removed during their current intrusive testing on Bldgs E&F. RE is only involved in intrusive testing, and is not performing any other improvement work on the buildings. We appreciate your patience during this necessary work period.

Community News

Fitness Center Reopening - Saturday, October 14, 2017

The Community Fitness Center will reopen on **Saturday, October 14, 2017**, for use of the fitness equipment on the 1st floor only (the 2nd floor and pool deck remain closed for renovation). Construction of the south entry area and expanded management office will continue on the 1st floor while the Fitness Center is open. Please remember to use the north Community Center access door only (the south/main entrance will remain closed due to the construction). We are excited about this renovation and look forward to the new updated look!

Colorado Athletic Club 3-Day Passes

Should you choose to select another spot to work out during this construction period, Management has partnered with the Colorado Athletic Club (1821 30th Street in Boulder) to receive 3-day passes for any Peloton resident. The CAC is also offering participation in its Boulder's Healthiest program, running from October 12-26, 2017, which gets you 2 weeks of free CAC access and other benefits. Please stop by the Management office for more information and your 3-day pass!

Compost Bin Location

Previously we provided a list of what items are and are not compostible. That list is also currently posted in the D Bldg Mail Room. The compost bin is located on the north exterior side of the Community Center, near the top of the garage ramp, and is clearly marked. Check it out!
