Defect Repair Committee – Owner Technical Information Request

The Defect Repair Committee (DRC) is interested in obtaining any technical information from Peloton Owners that you feel may be relevant to the DRC's decision making regarding defect repairs. If you have specific technical information on addressing any of the construction defects, the DRC is interested in hearing from you. Please contact Association Manager Timothy Bennett at tbennett@ehammersmith.com or (303) 980-7474. The DRC is actively working to interview prospective project managers, engineers, and contractors, and Owner input will be reviewed with the professionals ultimately recommended by the DRC and approved by the Board of Directors.

We appreciate your input and participation in this important process.
